Education

Altinbas University   Istanbul,Turkey
Bachelor of Software Engineering, GPA:3.6   2025

Experience

CodeHouse Yazılım Danışmanlık A.Ş   Istanbul
Backend Developer Intern
07/2023 – 08/2023

- Assisted in developing and optimizing backend microservices using Spring Boot to enhance system performance and scalability.
- Implemented and tested RESTful APIs with Postman, ensuring seamless integration and accurate data exchange between services.

Alemi Medya   Istanbul
Frontend Developer Intern
07/2022 – 08/2022

- Designed and implemented user interfaces for the 'AlifBee' app using Kotlin, enhancing user experience and functionality.
- Developed and integrated a pager view and various interface components, ensuring smooth navigation and intuitive app interaction.
- Collaborated with design and development teams to align UI features with user requirements and app objectives.

Projects

Baby Tracker (Graduation Project)

- Developed a mobile application using Flutter framework to assist mothers in optimizing their daily tasks and many other features.Utilized PHP, MySQL, and REST API for backend development.And implemented Provider for state management, following the MVC architectural pattern.
  GitHub Repository for Flutter: https://github.com/Nafoury/baby_tracker1.git
  GitHub Repository for Php : https://github.com/Nafoury/babyphp.git

Pharmacy Registration System

- Developed a mobile application using Java with SQLite as the database and Firebase for authentication purposes. The application facilitates the management of pharmaceutical inventory, allowing administrators to register, delete, update, and view drugs within their pharmacy.
  GitHub Repository: https://github.com/Nafoury/pharmacy_register.git
